

WHY YOU NEED A SOLAR COVER FOR YOUR POOL

Using a solar cover on your pool reduces heating costs by up to 70%. A solar cover also; increases the water temperature of your pool, helps to conserve water and pool chemicals, as well as keeps your pool cleaner. Solar covers are the only truly effective way to minimize evaporation and heat loss from your pool. Water additives and other systems have been proven to be significantly less effective than a traditional solar cover.

BUY A ROCKY'S!**

WHY PURCHASE A ROCKY'S REEL SYSTEM?

Rocky's Reel Systems® are easy to install and simple to operate. They are precision-crafted from DIE-CAST ALUMINIUM (no cheap plastic here!) and are built to last. With few moving parts, they are easy to operate and maintain. Our Reel Systems come in various sizes and styles in order to fit every pool. Our ten-year warranty is the best in the business, giving our customer's peace of mind that they are buying the best. We guarantee it.

4" TUBING: Rocky's 4" Commercial Tubing is available in standard sizes from 16'-33'. Ask about our custom cuts if you require something outside of this range.

3" TUBING: The **AT-1** Adjustable Tubing is for pools up to 21' wide. The **AT-2** Adjustable Tubing is for pools up to 24' wide. *End Unit selection would be determined off of pool length.*

RESIDENTIAL SYSTEMS

#3A PORTABLE REEL

The #3A Portable Reel System is the most popular of Rocky's Reel Systems®. It is perfect for the typical backyard pool. The portable design allows you to easily reel in the solar cover and wheel it out of the way. It uses Rocky's specially designed AT-1 or AT-2 Adjustable Tubing.

#4A PERMANENT REEL

The #4A Permanent Reel System is made to be bolted in place. This Reel System can be mounted in various ways (to walls, on above ground pools, raised decking or under a diving board.) providing versatility. It is great for Swim Spas and uses Rocky's specially designed AT-1 or AT-2 Adjustable Tubing.

#5A PORTABLE REEL

The #5A Portable Reel System is the most robust of Rocky's Residential Reel Systems®. It is designed to handle heavier solar covers. It uses Rocky's specially designed AT-1 or AT-2 Adjustable Tubing.

COMMERCIAL SYSTEMS

JUNIOR REEL

The Junior Reel System is the smallest of Rocky's Commercial Systems. It is portable and has extra stability with the additional third leg. The Junior System uses Rocky's specially designed, heavy duty, 4" Commercial Tubing. This system can cover pools up to 85' long!

SENIOR REEL

The Senior Reel System is designed to handle large solar covers up to 100' long! The extra strong base gives additional clearance so it can handle the weight of a larger solar cover. The Senior Reel System uses Rocky's specially designed 4", heavy duty Commercial Tubing.

HIGH RISER REEL

The High Riser has the highest deck clearance out of all Rocky's Reel Systems and is designed to clear obstacles on the pool deck. The longer handle and higher profile make this unit excellent for elderly pool owners that don't want to have to bend over to reel in their solar cover or for larger commercial pool applications. The High Riser is available in both residential and commercial models.

ROCKY'S SPECIALLY DESIGNED, 12-SIDED, ANODIZED TUBING

Our tubing is extruded from solid Aluminum and is the strongest tube available on the market. No more unsightly sagging!
