

ULTIMATE FALL CLOSING CHECKLIST

FOR YOUR ABOVE GROUND POOL

Here are some tips to help you properly close your above ground pool and ensure it and your pool equipment is in good condition when the next Summer comes! If you need help, or if this is your first time, let us know and we can help you. Feel free to contact one of our pool closing specialists by email, at: customerservice@poolsuppliescanada.ca

EQUIPMENT YOU NEED

- Pool Pump
- Winter Cover
- Closing Chemicals
- Return Jet Plug & Skimmer (Gizzmo)
- A Friend to Help

CLOSE YOUR POOL

- Inspect the Pool:**
Ensure your pool, liner and other equipment are leak-free, rust-free, and in good condition
- Add Closing Chemicals:**
Test your pH, total alkalinity, chlorine and/or salt water levels and ensure they are balanced. Allow closing chemicals to circulate prior to disconnecting equipment.
- Drain Your Pool**
Lower the water level until it is 6 inches below the skimmer opening. Never fully drain your pool. **Tip:** If you live in an area where the temperature drops below -30° on a consistent basis, drain your pool until it is 18 inches deep. Never full drain your pool.
- Check your Skimmer & Return Jet**
Remove all hoses and fittings attached to your skimmer and leave the drain open so water can freely flow out. Plug the return jet, but **never plug your skimmer.**
- Winterize your Equipment & Install Your Winter Cover:**
Winterize your pool equipment (pump, filter, heater, etc) according to the corresponding owner's manuals. Then, install your above ground Winter cover and secure in place

ULTIMATE FALL CLOSING CHECKLIST FOR YOUR ABOVE GROUND POOL

Are you in need of Winter Product, or are you looking to take your pool closing to the next level? Here are some products we recommend:
